Thanks, Sandy. I had trouble getting to the spreadsheet from home. I think the problem is my Mac not liking Excell. I'll resolve in the morning and we will continue to update from HQ. - George

Nancy, David, Here's where we are this morning. (David, I went ahead and noted the Earth Island/Huff post request as closed, but left a note in the status column that we need your confirmation the docs were sent). I'm also attaching this in a file as that may be easier to view than the version below – sometimes it will let me adjust the screen view; sometimes it won't.

George, I've been trying to send these "status reports" to Nancy and Dave the past few days so it's easier to see what's open. Going into the tracker itself can be time-consuming.

If you all need me over the next few days to answer any questions, please feel free to call (202-631-0272). Reception may be poor, but if you leave a message, I'll get back to you as soon as I receive.

Native Show
AmeriMonica is
2649/8/2015 Calling Braine 9/18,
1 pm

We are having
another show on
Native America
Calling about the
Gold King mine spill.
The show is on 9/18
at 1pm eastern. Can
you please provide
someone from the
EPA to be on our
show?

Will
CLOSE
on
9/18
with
an
interview
with
EOC Jared mbraine@nativeamericacalling.com
(Kelly
Zito is
the
lead)

As the investigation moves forward about the Animas Spill, we'd like to book someone from the EPA for a conversation on our show in the future. We want to focus on a forward-looking conversation, like consideration of other mines, precautions the EPA is taking, how long you'll be monitoring/cleaning Animas. We've done a few stories about the Animas spill, including this conversation with the Stakeholders group, and therefore would love to touch on that as well. Grace Hood informed us about the meetings with the stakeholders that you had, and provided minutes from the meetings for. Anyway, do you think that we could get on your radar for the near future?

DETAILS ON SHOW:
 We can go live or taped. It usually depends on the guest, and their comfort level. Live is always our preference. It would be between 10 - 20 minutes. It is just an interview with our host, Ryan Warner. The show is live at 10AM (Mountain), Monday - Thursday.

I wanted to see if the EPA had any reaction to Rep. Bill Johnson's contention at today's House hearing that the EPA removed audio from its website video footage in which a worker at the mine says, "What do we do now?"

Did the EPA remove the audio, and if so, can you tell me why?

(Re: the 9/9/15 hearing)..I thought the Democrats and Stanislaus did a pretty good job of putting the spill in perspective. I saw this Colorado Watchdog piece and talked to the mine owner myself today who reiterated the same notion -- that the testimony was incorrect on this particular count -- about the cave-in:
[http://watchdog.org/237424/epa-hearing/?utm_source=newsletter&utm_medium=.Can you talk to me about it or point me in the direction of a response? FOLLOW-UP: Do you happen to have a link to the investigation you reference? FOLLOW-UP: can you or anyone at EPA provide me with a comment about the cave-in issue? Do you want to clarify that Stanislaus wasn't blaming the cave-in for the spill? I think it's fairly clear from my story that he didn't, but wanted to let you clarify it for my readers if you wish. Some kind of comment on Hennis' allegation that this is misinformation from the EPA? Also, he told me the only people at EPA he's been able to talk to are workers at the site. That "all attempts to talk to anyone up the chain-of-command have been rebuffed." Is that true and do you know if it's standard operating procedure?](http://watchdog.org/237424/epa-hearing/?utm_source=newsletter&utm_medium=.Can you talk to me about it or point me in the direction of a response? Jazeer Flynn

Request for an on-camera interview with Jared to discuss the effect of the spill on Navajo Nation while they're in Farmington on Monday. FOLLOW-UP: Below are a few questions we'd like to ask Regional Administrator Jared Blumenfeld. Ideally we'd like to do an on-camera interview with him on Monday, Sept. 14. We'll be in the Navajo Farmington, NM area on ~~Concent~~ that day. If he's not in the area that day, we could possibly arrange for a camera crew to meet him and conduct the interview.

-In your letter dated Sept 3 to President Begaye, you asked him about bringing your teams together for a meeting after Labor Day - has a meeting been planned?

-Through your sampling program - the EPA has determined the San Juan River water quality has returned to pre-release conditions. How do you address the Navajo Nation farmers who refuse to believe the water is usable?

-What are the EPA's next steps with respect to the San Juan River spill?

-What's the status of the Gold King Mine?

Deliberative Process/Ex. 5

1) How much had first four (listed under “work stopped”) progressed? In other words, how far along were projects? (how much money spent? How much work done? etc) 2) **And am I correct in assuming that work has not yet begun on the ones that say “further assessment needed”?** 3) What area and what mines or mills are covered under Upper Tenmile Creek?, 4) -What area and what mines or mills are covered by “James Creek Release”? Is it in Boulder County, Colorado? Is this the Captain Jack mining district or something else? 5)–What area and what mines or mills are

Status covered by “Eagle River”?

Matt COB,of Does this include the
 9/10/2011 Brown9/11 other Eagle Mine? Is it only the mines Eagle Mine, or are there other mines or mills involved? Does it include the entire Eagle River, from Tennessee Pass to the Colorado River, or only a portion of it? 6) - What kind of activities would be put on hold on Leviathan and Iron Mountain? What activities would not (water treatment plants, etc.)? 7)-Same question for the other sites on the list: what’s being put on hold? In Colorado, for example, we were told by mayor of Crested Butte (closest town to Standard Mine) that work resumed about 10 days ago....

Does EPA have a response

Response to President Russell to Begaye’s request the Begay Upper Animas Mining statement District be listed on the NPL as a Superfund site?
